PLATINUM OUTPUT DOUBLED LAST YEAR

Production Perensing in United States -Metal Csed in Manufacture of Sulphuric Acid.

Washington, Nov. 30.-While the United States produces merely a fraction of the platinum supply of the world, its output of the precious metal was double in 1908 what it was in 1907, according to a report, which David T. Gray has just made to the United States geological survey. But owing to a decrease in the prices of the prodict, the increase in revenue was only

Russia exports to this country from \$1,000,000 to \$2,000,000 worth of platinum

In the United States platinum is produced only as a by-product of placer mining in Oregon and California. While the oldest and best known use of platinum is its excellence as a metal of high first best that the constraints. high fire test, the report says the greatest use now made of the metal is in the manufacture of sulphuric acid and more than half of that acid is now made by the use of platinum.

STOCKS FIRMER TODAY.

Columbus Con. Stronger-Yankee Con. Active-Daly Judge Traded In.

The market generally was firmer this morning, though there were no marked changes outside of Columbus Con., which opened at 1.57 % and moved up to 1.63. Daly Judge sold at \$5 and Yankee Con, came out with a small lot at 10. Lower Mammoth and Iron Blossom were both stronger the former selling up 42 and the latter to

New York was also active at a better prices sales being made at 13. Uncle Sam was in demand at 53 and Grand Central loosened up 400 shares at 2.47½. Colorado was sluggish at 53. Bingham Amalgamated was traded in at 10.

Closing quotations were as follows:

Best Specimens of Ore Yet Discovered In the Graham Mountains.

In the Graham Mountains.

Waiter Sparks came in Wednesday from his mining claims in Sparks canyon, which is located between Jacobson's canyon and Stockton Pass, in the Graham mountains, says the Graham (Ariz.) Guardian. Mr. Sparks states that he has now reached a depth of 75 feet in the incline shaft of the Sure Shot claim and has started cross cutting the vein to the hanging wall. The vein appears to be a large one, perhaps 30 feet or more.

From 40 feet to present depth in shaft, the vein is heavily mineralized and showing better with depth. The vein matter is quartz, and the mineral is bornite copper and sulphide. The rock is impregnated with native copper, which is now showing in large quantity. The specimens shown by Mr. Sparks are the best ever seen from Grahams. He has probably located on the biggest ore body yet found in these mountains.

GOLDEN PRINCE HAS CAVE.

Discovery of Another Bedded Vein

Also Reported by Manager Coxe. Another bedded vein is reported to have been encountered at a distance out from the shaft 230 feet on the 500 foot level of the Golden Prince propfoot level of the Golden Prince property at Ploche. After passing the second fissure vein, 16 feet of mineralized lime was cut through—apparently a lime horse—and then the drills penetrated an open cavity between the lime horse and the bedded vein says the Record. Just what the thickness of this vein is has not been determined, but the top, sides, bottom and face showed ore of a considerable better grade than that developed in the fissure just passed. The ore in the bed is very similar in character to that found in the fissure being intermixed with very similar in character to that found in the fissure being intermixed with chlorides, galena and manganese, associated with satisfactory values in gold. The open cavity, is said to be at least 50 feet deep, which fact was demonstrated by a candle descended into the cavern by means of a wire. Some elegant specimens of wire silver were brought to the surface yesterday from the newly discovered bed.

HEAVY COPPER EXPORTS.

iod Last Year by 2,650 Tons.

(Special Correspondence.) York, Nov. 30.—Shipments copper for the week ending Nov. 25 were 19,695 tons, or 44,118,840 pounds as compared with 17,045 tons for the simicompared with 17,045 tons for the similar period of 1908. Some of the shipments by leading exporters for the week ending Nov. 20 were as follows:
United Metals Selling company, London, 1,120,000 pounds: Liverpool, 1,792,000: Antwerp, 44,857; Havre, 560,157; Rotterdam, 1,074,657; Liverpool, 1,120,267; Manchester, 112,152; Hamburg, 26,776.

Phelps, Dodge & Co., Liverpool, 672,-600 pounds; Rotterdam, 672,750; Hamburg, 392,096.
American Metal company, Liverpool, 448,022 pounds; Genoa, 22,463; Havre,

American Smelting & Refining com-pany, Havre, 436,451 pounds; Hamburg, 22,523; Genoa, 7,821.

BIG ELY CONSOLIDATION.

Cumberland Absorption by Nevada Con. Practically Complete. (Special to The News.) New York, Nov. 30.—The absorption

New York, Nov. 39.—The absorption of the Cumberland-Ely Copper by the Nevada Consolidated Copper company is practically completed. Out of a total of 1,300,900 shares of Cumberland-Ely stock more than 1,100,000 has been exchanged on the basis of three and a feastly shares of Chumberland-Ely for changed on the basis of three and a fourth shares of Cumberland-Ely for one share of Nevada Consolidated stock. In addition to these large exchanges of stock, practically all of the \$3,000,000 Nevada Consolidated first convertible 6 per cent bonds and the \$1,000,000 f per cent sinking fund gold bonds of the Nevada Northern Railway company have been turned in for conversion into stock of the Nevada Consolidated Copper company.

STIMULUS FOR GOLDFIELD.

Reports from Goldfield state that the proposed consolidation of the Sand-torm and Kendall mines is looked upon proposed consolidation of the Sandstorm and Kendall mines is looked upon with much favor by mining men in the camp. Each of the properties has produced gold to the value of \$400,000 as the result of leasing. The first discovery of gold ere in the Goldfield district which led to the stampede in 1903 is raid to have been made near the Sandstorm, and on Thanksgiving day 1904 the first discovery was made on that property, ore valued at \$5,000 being uncovered by the first shots put in near the surface. Considerable ore was taken out during the ensuing eight months by leasers who did not go deeper than 200 feet. Since then considerable development work has been done by the companies, and a great deal of low grade ore has been blocked out. In May last the Sandstorm is reported to have shipped 400 tens of dump ore to the samplers which netted the company \$4.300. For the past 18 months no work has been done at the mines and the proposed consolidation will result in renewed activity and prove a stimulus to the camp.

THE COPPER MERGER.

Plans Being Changed to Meet Require-

ments of Federal Statutes. New York, Nov. 30.—The proposed merger of the large copper producing companies is still in process of forma-tion, according to a statement made oday at the office of J. P. Morgan &

Company.

It is believed the Standard Oil decision, however, has altered the plans for the copper combination and those having the matter in hand will bring about the coslitton of the copper interests in such form as not to be affected by the federal statutes.

No announcement of plans is expected for several weeks.

RENEWED ACTIVITY AROUND MARYSVALE

G. F. Daiton Reports a Number of Men Employed at Different Mines -Shamrock Shipping.

G. F. Dalton, superintendent at the Shamrock Gold Mining company's property at Marysvale, who was in the city today, reports a great deal of activity in that camp. At the beginning of the year, Mr. Dalton says, there was not a man working there, and now there are a number of properties which are employing several men. This condition is expected to improve as soon as the Cascade Gold Mining & Milling company decides to build a power plant and srect a custom mill for the treatment of the low grade ores of the camp. Mr. Dalton says this proposition is now being considered by the Cascade company, and will be carried into effect in year, Mr. Dalton says, there was not being considered by the Cascade com-pany, and will be carried into effect in the near future. The company has a big body of silver-lead ore already de-veloped, and the management is now said to be raising ore from the tun-nel, which is in about 350 feet. The ore body is said to be all of 35 feet wide on the tunnel level.

the tunnel level.

The Shamrock Gold Mining company The Shamrock Gold Mining company has just marketed a car of ore carrying 40 ounces sliver, \$10.80 gold and 3½ per cent copper. This ore has been taken out in driving a tunnel on the vein, which is now in about 100 feet. More ore has been extracted and another shipment is said to be on the way. The company owns two claims, and the drift now being run is headed for the contact, where a large ore body is expected.

for the contact, where a large ore body is expected.

Work has also been resumed at the old Deseret mine, which is being developed by Salt Lake people. The tunnel which is now in between 700 and 800 feet is said to have a 20-inch body of ore in the face of good grade.

Some work is also being done at the Warnock fraction, where a big body of milling ore has been developed. Bamberger and McChrystal of Salt Lake are also said to be working the Wright property, which has a fine showing of ore in spite of the fact that the deepest workings do not exceed 300 feet. workings do not exceed 300 feet. Henry Outzen of Richfield is reported

to be employing five or six men on his group of claims which carry gold principally. He is said to be driving a tunnel to connect with the shaft which has been sunk on ore carrying from \$10 to \$20 to \$20.15.

The principal work being done in the district at one property is that of the Log Cabin Mining & Development com-Log Cabin Mining & Development company, which is employing about 25 men. The company has done a great deal of work, the main tunnel being in about 3,000 feet. This tunnel is being run north towards Bullion canyon from Cottonwood. The management is running this tunnel to cut the vein which appears on the surface, and which is expected to be intercepted any day.

As the result of the mining activity in the vicinity, the town of Marysvale is said to be taking on new life, several stores having been recently built there.

FEDERAL ELY IN DEMAND.

stores having been recently built there

McDonald Ely and Federal Ely were McDonald Ely and Federal Ely were the only active stocks among the un-listed this morning at the open call at the close of the regular session of the mining exchange. The former of these stocks sold at 38, and 4.000 shares of the latter changed hands at 20. Demi-john was offered at 6 with 5 bid, while Proche King was offered at 30. john was offered at 6 with 5 Proche King was offered at 20.

ELY-CENTENNIAL STRIKE.

E. W. Griffiths is conducting the development campaign at the Ely development campaign at the Ely Centennial, came in from camp last night with the news that the first vein has been tapped in the tunnel at a distance of 80 feet from its mouth. The tunnel was alrealy in over fifty feet when the presen: company took hold of the property so that the new company only extended it 30 feet before ore was encountered. The vein is about four feet wide and contains ore carrying 8 per cent copper, 10 ounces silver and \$1.80 in gold per ton.

ton.

Another important find has been made on the surface of the property in the shape of lead ore. A few men have been put to work at this point with the view of determining the value of the discovery.

Mr. Griffiths reports the Ely Calumet company grading for houses and preparing for the 1,000-foot shaft which is to be sunk on the property. The camp has now a payroll of

which is to be sunk on the property. The camp has now a payroll of \$300,000 a month, Mr. Griffiths says, and merchandise is going into the camp at the rate of 25 carloads a day. In the opinion of Mr. Griffiths Sait Lake merchants are not getting their full share of this traffic which is destined to grow to much greater proportions in the near future.

CONCENTRATES.

The Beaver County News states that another fine fissure has been cut in the Indian Queen tunnel which is in 3,900 feet. The face of the tunnel is said to be more mineralized than it has been for a long time. P. Hite, who has been extracting

the gold from the gravels and sands of the Colorado river near Glenn's canyon, Garfield county, for several years past, is in the city. Mr. Hite says there are eight outfits at work on the river at the present time, all of whom are meet-According to the Battle Mountain

Merald, the tunnel being run in the Nevada-Omaha Mining & Milling com-pany will reach its objective point in the next 60 feet, the intention being to get under the shaft where a body of very rich ore has been followed from the surface. The tunnet is now in 225 feet, and it will tap the vein about 50 feet below the bottom of the shaft.

BUS PASSENGERS

Moreton Frewen, a noted political economist of England, is a guest at the Knutsford. At the Commercial club Wednesday evening he is to deliver an address on silver and the oriental trade, and a reception is to be given the distinguished visitor. Mr. Frewen has been to America several times and is not unfamiliar with the west. "I do not know that I can say much to you o interest about English politics," said Mr. Frewen to The News today. "The use of lords seems to be rather illhouse of lords seems to be rather ill-advised, though Lord Lansdowne, a leader, is cautious and conservative. The present budget is quite unpopular and the country relies on the house of lords for protection, and if the house of lords do not give the people a chance to vote they would be lacking in their duty.

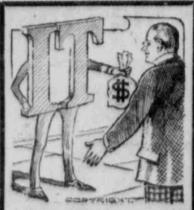

Arthur Pearse of London is a guest at the Knutsford. Mr. Pearse is inter-ested in mining property in this state and is here to look after his interests.

TROY LAUNDRY. THE LAUNDRY OF QUALITY

HEAVY OFFERINGS **LOWERED PRICES**

New York, Nov. 30.—The active open-ing dealings in stocks today did not cause much change in the price level.
Only a few of the prominent stocks moved widely from last night's closing. The gains and losses were much mixed and ne contest between the opening specula tive forces was evident. American Sugar advanced 1%. Amaigamated Copper,

dvanced 1%. Amaigamated Copper, Anaconda and Reading 1 and Wabash preferred, Canadian Pacific and American Smelting large fractions. St. Louis & San Francisco second preferred declined 1%. American Car 1, and Great Northern preferred &.

The strength displayed by a few important stocks at the opening brought heavy offerings for both accounts and prices went down quickly to below yesterday's closing. The copper stocks and American Sugar were, as on yesterday, the chief points of weakness. International Harvester and American Hide & Leather preferred 19st 2, Kansas & Texas preferred 1%. Mackay Companies 1%. American Sugar, Utah Copper 1%. Northern Pacific, Texas & Pacific, Cleveland, Cincinnati, Chicago & St. Louis, Erle second preferred, Minneapolis& St. Louis, Illinois Central, Colorado Fuel, Great Northern Ore Certificates, American Steel Foundries and American Beet Sugar 1. Supporting orders caused a moderate rally later and the list became quiet. Prices weakened again, some of the rallroads coming into the movement. Reading was forced 1% under last night, Norfolk & Western 1½, and New York Central, Louisville & Nashville and Great Northern preferred 1% A long list of industrials suffered losses of a point or upward, including the United States Steel stocks and other iron and steel industrials.

dustrials suffered losses of a point or upward, including the United States steel stocks and other iron and steel industrials.

American Malting preferred dropped 3%, Great Northern Ore Certificates 2%, American Car & Westinghouse Electric 2, American Cotton Oil 1% and Westerl Union and Republic Steel 1%. Wabash preferred rose 1%. The market steadled and became dull at noon.

Bonds were weak.

Large purchasing orders were distributed in Amalgamated Copper, Reading, Union Pacific and American Sugar, which produced a show of strength in the rest of the market.

produced a show of strength in the rest of the market.

Many of he prominent railroad stocks rose to about yesterday's prices and the losses in some of the industrials were fully made up. American Sugar and Central Railroad of New Jersey sold 2 points over last night, Amalgamated Copper 1%. Union Pacific 1% and Northwestern 1%. Pittsburg Coal preferred lost 3 points.

The market closed quiet and steady. The market showed great hesitation late in the day. Prices fluctated below the best of the recovery but without falling to the previous low point. Rock Island preferred rose I and Consolidated Gas 1%.

Hogs—Receipts, 6,300; market 5c. higher. Heavy, 8.10@8.30; mixed, 8.10@8.35, ight, 8.00@8.15; pigs, 6.76@7.75; bulk of sales, 8.05@8.15.

Sheep-Receipts, 7.500; market strong, Yearlings, 5.40@6.40; wethers, 4.40@6.40; ewes, 4.00@4.30; lambs, 6.75@7.65.

WOOL.

ST. LOUIS.

St. Louis, Nov. 20.--Wool, dull. Territory and western mediums, 24@29; fine mediums, 21@25; fine, 13@20. BOSTON.

Boston. Nov. 30.—Trading continues dull in the wool market with full prices for all desirable selections.

The supply is reduced to a minimum al'hough Oregon staple is fairly abundant, being held at 75 to 78 cents washed. The call for fleece wools shows a slight improvement with some sales of Ohio three-eighths blood at 38 cents. It is understood that bidding for the 1916 crop has practically ceased.

PRODUCE.

Chicago. Nov. 26.—Weak cables and continued large receipts in the northwest inspired fresh liquidation in the wheat market during the early trading today, resulting in further declines following the weakness of the previous session. A decline of % to %d at Liverpool was due to the generaly favorable outlook for the foreign wheat crop. Trade was inclined to drag at the start, owing to poor support. Prices at the opening were % to lower, with December at 1.05% to 1.05%. May opened at 1.05% to 1.05% to 1.05%. May opened at 1.05% to 1.05% and within the opening range but May sold off to 1.05% at %.

Renewed profit-taking in the December delivery caused weakness in the corn market. The selling was based chiefly on the constantly increasing receipts and the continued slackness of the demand for the cash grain. Opening quotations were unchanged to ½ lower. December at 28 to 58% and May at 61% to 61% at %. Later in the day December touched 57%, while May held around the opening point. Oats were steady although December liquidation tended to create bearlsh sentiment in the pit. That option opened unchanged at 38% and sold at 29%. Provisions reacted from the continued advance of the last few days, prices declining moderately early in the day owing to general selling by bolders. Prices at the opening were 21% c, higher to 10c. lower.

Ower.

Wheat—The market was inclined to sag all day but railed sharply in the final half-hour on covering by shorts. From 16 the December delivery advanced to 166%, while May sold up from 1.05% a to 1.05%. The close was strong at almost the top, December being up 16 at 1.05% May 16c, higher at 1c, at 1.05% May 16c, higher at 1c, at 1.05% May 16c. Close-Wheat-Dicc. 1.06%; May, 1.06%

: July, 97%. Corn-Dec., 58%; May, 61%; July, 60% Corn-Thec., 88%, May, 81%; July, 80%; Sept., 60%.
Oats-Dec., 39%63%; May, 42; July, 40.
Pork-Jan., 21.80; May, 29.75.
Lard-Nov., 14.30; Jan., 12.52%; May, 11.57%; July, 11.50.
Ribs-Jan., 11.30; May, 10.82%.
Rye-Cash, 74%; Dec., 72.
Barley-Cash, 520.66.
Timothy-Nov., 2.75; March, 2.90.
Clover-March, 15.90.
Corn-The late bulge in wheat caused moderate atrength especially in the future deliveries. The class was firm although December was % below the previous close at 58%.
May was % higher at 61%.
BUTTETR AND EGGS.

BUTTER AND EGGS.

Chicago, Nov. 20.—Butter—Steady. Creameries. 26@30; dairies. 34@25. Buge—Steady, at mark, cases included. Diagrably; receipts. 4.680; firsts. 28%; crime frats. 20%; Cheese—Steady. Daisies, 15%, 20%;
